

Knowledge based systems
Analysing the eligibility of a person for higher education using a
Bayesian network

Contents

1	Introduction	2
2	Analysis of data	3
3	Structure of the network	4
4	Learning conditional probability tables (CPT)	5
5	Implementation (WhatToStudy)	6
	Appendices	8

Chapter 1

Introduction

What are Bayesian Networks, Applications, Foundation

Chapter 2

Analysis of data

Analysing data using Data Mining techniques (Parallel Coordinates). Finding connections

Chapter 3

Structure of the network

Creating the structure of a Bayesian Network

Chapter 4

Learning conditional probability tables (CPT)

Algorithms that can be used to learn the CPT

Chapter 5

Implementation (WhatToStudy)

Concrete implementation of the program, functionalities and documentation of implementation
